

Grey Box Engineered Flooring

LB Timber

from \$60.00

Description

Grey Box flooring combines dimensional stability with authentic wood aesthetics, making it an ideal choice for Australian homes. The engineered construction features a real timber veneer (3mm thick) bonded to a plywood base, resisting moisture and temperature fluctuations better than solid hardwood. This makes it particularly suitable for kitchens, bathrooms, and areas prone to humidity variations. The Grey Box finish delivers contemporary appeal with subtle tonal variations that complement modern and transitional interiors. Installation is straightforward with click-lock systems, reducing labour costs and project timelines. Engineered flooring also offers excellent durability for high-traffic zones while maintaining the warmth and character of natural timber.

Specifications

Species	Grey box
